

MINNEAPOLIS, MN – June 27, 2016

Leading Caterers of America, an exclusive and select group of the most successful caterers throughout the US and Canada, is pleased to announce that Neuman's Kitchen of New York City has passed its peer review and other qualifications. With this accomplishment, Neuman's joins the LCA as a new member.

According to Leading Caterers' Executive Director Carl Sacks:

"We are extremely pleased to have Neuman's Kitchen join Leading Caterers of America. Paul Neuman and his talented team are highly capable and sophisticated caterers. With 30 plus years of high profile catering in New York, the largest and most competitive catering market in the world, Neuman's has been a great success story."

"Neuman's is unique in that they bring the same culinary expertise and service finesse to their daily corporate business as they do to the high end full service events that they cater. Neuman's has recently taken their next step by moving into an ultramodern state of the art facility in trendy Long Island City. This new facility will allow the company to enjoy another thirty years of growth."

Leading Caterers of America is an invitation only caterers' consortium, founded in 2007. Its members are the leaders in their respective markets and the trendsetters in the industry. Through proven creativity and best business practices they have risen to the top of their markets by consistently delivering superior results. LCA is affiliated with UBM Catersource LLC.

To be a member of Leading Caterers of America, caterers must pass a rigorous evaluation and peer review of their quality standards, creativity, focus on service, and client feedback. The LCA currently has fifty-three members throughout the US and Canada, and its members generate well over half a billion dollars annually in catering revenue. Many of the largest independent caterers in North America are LCA members. Clients of the individual LCA members benefit from access to the network and expertise provided by these top caterers.
